09.06.2007

A 2 years 8 month old chocolate tabby point Birman of quality. What a lovely start to the day, a well grown strong young man of excellent type, the body long and massive. Broad and rounded skull. The medium size chocolate coloured ears showing thumbprints, are set well apart on the head. Medium length nose, correct slight dip when viewed in profile. Full and rounded cheeks, excellent strong and rounded muzzle, good chin. The bite is level, nose leather pink outlined in chocolate coloured pigment. Expressive almost round deep blue eyes. Full face mask, extending across the spotted whisker pads. Points colouring milk chocolate tabby markings on a light bronze agouti ground. Mask shows clear 'M' to the forehead, light coloured spectacle markings surround the eyes and clear tabby markings to the cheeks. Medium length thick set legs, the front legs showing clearly defined tabby markings. Pure white front gloves, a little low but matching. The left back sock is slightly higher than the right, excellent full length tapering gauntlets. Full length ivory body coat, this is silky soft to the touch and has been carefully groomed. Clear clean underbody. Full masculine neck and chest ruff enhancing this lovely Birman's type. Well furnished chocolate coloured tail, perhaps a fraction longer to balance the body, showing several tabby markings underneath. A fine example of a chocolate tabby, good enough to eat! Superb laid back temperament a perfect gentleman, with superb presentation to match. Congratulations.

An impressive masculine 5 years 10 month old seal bi-colour Ragdoll of excellent type. He is long bodied and strong boned, with a broad chest and short powerful neck. The head is broad with a flat plane, excellent width between the medium size ears, these show the desired slight forward tilt. Well developed cheeks, strong rounded muzzle, firm chin and level bite. Medium length nose when viewed in profile shows a gentle dip and slightly retrousse at the tip. Expressive deep blue large eyes, slightly oblique in their set. Substantially boned medium length legs and strong paws. The mask shows a balanced inverted 'V' of white from the forehead extending down to cover the nose, whisker pads and chin. The remainder of the mask is rich seal brown. The bib chest and entire underbody is white. The front and back legs are white to the level of the underbody. The remainder of the body coat is predominately dark beige, with one or two patches of white. Just a little coarse on the lower back today. Full

length neck ruff and knickerbockers. The tail is seal brown, of good length to balance the body and tapers towards the tip. Another gentle laid back male, beautifully presented by his devoted owner.

AV SLH Imperial Grand Champion Female

1st IGr Ch Ensor's **GR CH KITTAH THALIA** (13c2) F 04.07.2005

A 4 years 7 month old blue point female Birman of very good type size and boning. She is long in the body and showing very good balance today. Broad rounded skull, neat greyish blue ears set well apart on the head. Medium length nose, the profile showing desired slight dip. Fairly wide rounded cheeks, level bite and firm chin. Strong muzzle, the nose leather is slate grey. Full greyish blue face mask, this extends across her whisker pads. Almost round expressive eyes of a very good blue. Clean white front gloves, these finish across the angle formed by the paw and leg. Slightly stained back paws, the socks are low, blue colour dips down a little on the right sock, narrow medium length gauntlets. Full length bluish white body coat silky to the touch. Feminine neck ruff frames her pretty face. Clear underbody. Medium length greyish blue tail to balance her body. Gentle temperament and nicely presented.

1st Wormald's **IGR CH & GR PR DANLEIGH STARBURST** (13c6) FN

5 years 10 month old seal tortie point Birman of quality, she has very good type her head being broad and rounded. Full seal tortie mask showing all required colours. Almost round eyes of medium blue, rounded cheeks and strong muzzle. Well marked gloves, socks and gauntlets. All points intermingled with shades of seal brown and dark and light red. Full pale beige body coat and neck ruff. Beautifully presented as always.

2nd Shaw's **MOONENCIA PALOMA PICASSO** (64.41ew) FN 03.03.2009

Almost 1 year old green eyed tortie and white classic Maine Coon of very good type. She is an excellent size and weight. The head is medium in length and of good breadth, fairly full cheeks and high cheek bones. Medium length nose with shallow concave curve at the nasal bridge. Tall and large ears, well feathered, wide at base, set high but well apart on the head. Full and round green eyes, spaced wide apart and slightly oblique in aperture and set. Strong muzzle, level bite and good depth chin. Long and muscular body, substantially boned legs and large rounded paws with tufts. Excellent tail long and flowing, wide at base and tapering towards the tip. Coat length developing as is the frontal ruff. Vibrant markings to the body cost, black classic pattern overlaid with shades of red. White to muzzle, chest and all paws. Very attractive young lady developing well.

3rd Taylor's **BRIZLINCOAT NOBLEE OBLIGE** (63) MN

An 11 month old usual Somali of excellent type, the body is medium in size, feeling firm and muscular. The head shows a moderate wedge set on an elegant neck. The muzzle is gently rounded. The nose viewed in profile shows a slight nose break. The bite is level, he has a firm chin and red nose leather. Fairly large ears, they are well cupped and tufted on the tips, there is good width between. Expressive almond shaped eyes, these are amber in colour and slightly oblique in their set. The dark eye rims are encircled by light coloured spectacles. Good clear pencilling to the face. Long legs and oval tufted feet, the heels and toe tufts are black. Good length well furnished tail, this is broad at the base and tapers slightly towards the black tip. The body coat impression is that of a rich golden brown, made up of an apricot base coat clearly ticked with black. I did observe some grey roots today but did not feel this detracted in any way from the overall richness of coat colour. The body coat feels soft and fine and lies flat along the spine line. Attractive darker shading along the spine line and upper surface of the tail. Apricot colouring to chest, belly, under the tail and insides of legs and breeches. Another exhibit with delightful temperament and groomed to perfection.
